

BBP RESCUE GLOVES

Advanced Burn, Cut and Bloodborne Pathogen Protection

Dragon Fire BBP Rescue gloves provide the perfect combination of superior dexterity and advanced burn/cut protection, now with a bloodborne pathogen liner. Specifically designed for extrication, these multi-use gloves are lightweight, yet durable, to handle the toughest of jobs. The bloodborne pathogen liner offers protection to a rescuer in the event of contact with bodily fluids. And, each is lined with the patented, flame and tear resistant Kovenex® fabric, preventing injury from intense heat and burn, shattered glass particles and sharp metal objects.

SAFEGUARDED BY

Dragon Fire gloves are lined with the patented high-performance Kovenex fabric. Tested to National Fire Protection Association (NFPA) standards, Kovenex far surpasses the performance of other fire-resistant materials, blocking heat transfer and providing sharp protection.

Kovenex Fabric is engineered and manufactured by
Waubridge Specialty Fabrics, LLC
